

Investigation Team

The Team of investigators will be **the Producer of the show and selected members of the EMACT Board of Directors**. The team approach provides the ability to collaborate in the event that the accuser, the accused or a witness alters his or her earlier statements.

Once a complaint is shared – the Producer must call a board member and create an action plan. They must also decide if the alleged accuser needs to be suspended until the investigation is complete, as well as access the safety of the complainant.

A third party investigator can be used for complicated complaints.
